aproximante global de 10 términos (extremal-mass)
solver directo a $T = 0$ (work/kkr-extremal), 268 puntos
manuscrito, extrapolación $T \to 0$ (13 acoplamientos)
shooting / multiple shooting (extremal-mass/strong)
Myers–Perry: $m(0) = 3/2$
$m(s) = M_{\mathrm{ext}}/(\pi^{1/3} J^{2/3})$
residuo relativo al aproximante [10^{-6}]
$s = \pi^{2/3} \alpha / J^{2/3}$
